

Federated Hermes Absolute Return Credit Fund

Investment Manager – Hermes Investment Management Limited

The date of this Supplement No. 18 is 11 August 2020

This Supplement contains information relating to the Fund. This Supplement forms part of and should be read in conjunction with the prospectus of the Company dated 11 August 2020 as may be amended or updated from time to time (the "Prospectus").

Funds of the Company in existence as at the date of this Supplement are set out in the Global Supplement.

Unless the context requires otherwise, capitalised terms used in this Supplement shall have the meaning attributed to them in the Prospectus.

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, or other financial adviser.

The Directors of the Company, whose names appear under the heading "Management and Administration" in the Prospectus, accept responsibility for the information contained in the Prospectus and in this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information.

Profile of a Typical Investor

The Fund may be suitable for investors seeking a total return (capital growth and income) over at least a three to five-year time horizon and who understand and accept the associated level of risk attached to a fund that seeks to deliver an investment return in all market conditions. For more information please refer to the section entitled "Risk Factors".

An investment in the Fund should not constitute a substantial portion of an investment portfolio and may not be appropriate for all investors due to potential investment in emerging markets and in Below Investment Grade securities. Investors should note that at any point in time the Fund may invest principally in financial derivative instruments ("FDIs"). Potential investors should also be aware that the use of FDIs may increase the volatility of the Fund.

Investment Objective and Policies

Investment Objective

The investment objective of the Fund is to target a positive investment return (absolute return) over a rolling 12 month period irrespective of market conditions, but there is no guarantee that this will be achieved and your capital is in fact at risk.

Investment Policy

The Fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of debt securities (as referenced in the Categories of Investments section below). The Fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs. The securities in which the Fund may invest will be selected on a global basis.

Investment Strategy

In managing the assets of the Fund the Investment Manager will seek to identify Investments that it views as having the potential to add value while at the same time seeking to reduce market-related risks. For example, the Investment Manager will analyse securities of an issuer to seek to identify the extent to which the securities are exposed to credit risk. This will be done with a view to assessing whether the market price of the security in question is, in the Investment Manager's view, reflective of its value (after taking account of the credit risk). At the same time, the Investment Manager will analyse securities to seek to identify whether their market price is reflective of the value of the issuer of the securities (when taking market news into account). For example, the Investment Manager could hold a bond that is issued on terms whereby its value is capped if the credit risk of an issuer reduces (with the market value of the bond reducing). At the same time it could also purchase bonds (from the same issuer) with different terms or enter into FDI (related to the same issuer) whose value increases in the same circumstances.

The Investment Manager identifies credit assets which it believes will generate an absolute return, irrespective of market conditions. In addition to the analysis of individual issuers set out above, the Investment Manager will also undertake assessment of the Environmental, Social and Governance ("ESG") qualities of the issuer. ESG includes environmental items (such as the impact on natural resources), social issues (such as human rights) and governance (being the way in which the company is run). The Investment Manager assesses the ESG characteristics of a company by considering ESG research and scores from a wide variety of sources such as CDP, MSCI, Sustainalytics and Trucost amongst others. The Investment Manager believes that quantitative ESG data must be complemented by a fundamental bottom-up review of ESG issues, leveraging its knowledge of and direct contact and engagement with companies. The Investment Manager's approach to ESG integration in its investment analysis draws upon these internal and external sources to assign an ESG score to each country and company in the portfolio. To generate these ESG scores, the Investment Manager uses Hermes' proprietary scoring methodology to score a country or a company's ESG behaviours. This proprietary ESG score favours companies with lower ESG risks and companies who are actively improving their focus on ESG issues. The ESG score is also used to identify where active engagement with companies

by the Investment Manager would be useful, with the aim of reducing underperformance from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability.

The Investment Manager has a tactical and strategic approach to investment with a view to achieving an absolute return regardless of market direction over a rolling 12 month period. A strategic approach is taken where the Investment Manager takes a medium-to-long term view on the purchase of a particular asset (i.e., the longer the asset is held the more likely it will generate a gain). A tactical approach is taken where the Investment Manager takes a short-to-medium term view on the purchase of a particular asset with a view to exploiting short-term valuation opportunities. The Investment Manager can also seek to exploit divergent views on two companies in a market-neutral way: it can use FDIs to generate a long exposure to one company while also using FDIs to generate a Synthetic Short Exposure in the other company. This may be done when the Investment Manager believes an Investment Grade company has targeted for acquisition a Below Investment Grade company. In this way the Investment Manager would use FDIs to reduce market-related risks with the Fund then benefitting from the increase or decrease in the value of the companies (as the case may be).

The Investment Manager intends to diversify the Fund's exposure but it is not limited as to the extent of investment in different geographic regions, industries and/or stocks of a particular market capitalisation. The Investment Manager will hold a diversified portfolio of Investments at any one time and will (while being primarily invested in debt securities) apply discretionary internal limits to determine the weights of specific asset classes within the Fund.

The Fund's market exposure (which is exposure to the categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 0%-200% for long positions and 0%-100% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. These ranges are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark.

Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, money market instruments, cash and cash equivalents, Investments of the Fund will be listed or traded on Regulated Markets worldwide. Investments of the Fund may be denominated in the base currency or in other currencies.

Debt: The Fund may invest in debt and/or debt-related securities. Such securities may include, but are not limited to, bonds (that may be issued by corporations domiciled in, or that derive a large proportion of their income from, global markets, and/or public institutions and that may be fixed and/or floating rate securities, rated and/or unrated securities, Investment Grade securities and/or Below Investment Grade securities, Convertible Debt Securities, Asset-Backed Securities, Amortising Bonds and/or Defaulted Bonds) and money market instruments (including secured commercial bank loans that constitute money market instruments, bills of exchange, call accounts, notice accounts, certificates of deposit, commercial paper, asset-backed commercial paper, floating rate notes and short-term Asset-Backed Securities). Any of the debt

and/or debt-related Investments of the Fund (as noted above) may be unleveraged and/or leveraged. Investment in or exposure to such securities will be on a long or short basis.

Eligible CIS: The Fund may acquire units/shares of appropriate Eligible CIS, including exchange-traded funds and other sub-funds of the Company, where such Eligible CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long or short basis.

Equity: The Fund may invest in or hold equity or equity-related securities (such as investing in small, medium and/or large cap equities, common and/or preferred stock, ordinary and/or preference shares and/or Depository Receipts) issued by companies domiciled in, or that derive a large proportion of their income from, global markets. For example, the Fund could acquire equities as a result of an issuer's compulsory conversion of its debt instruments into equity or the Fund could decide to convert Convertible Debt Securities into equities where the conversion is expected to provide additional value. Investment in or exposure to such securities will be on a long-only basis.

Methods of Access and Efficient Portfolio Management

FDIs: The Fund may also gain exposure to the aforementioned debt securities, money market instruments, equities, equity-related securities, Eligible CIS and/or financial indices through the use of FDIs and/or through investment in Convertible Debt Securities.

The Fund may also use FDIs to gain exposure, manage exposure or alter exposure to the interest rate, credit and inflation markets and may generate long or short exposures through the use of FDIs.

The FDIs which may be used by the Fund for such purposes include Forward Currency Exchange Contracts, Futures, Options (such as credit/index Options (to include credit default Swap indices), equity index Options, Options on credit default Swaps and equity Options) and Swaps (such as index Swaps, credit default Swaps, and interest rate Swaps).

A decision to use FDIs may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying Investment or financial index than to purchase the Investment or securities within a financial index directly) or for investment/strategy purposes (i.e. to seek to protect the Fund in the event of a default of the issuers of bonds in which the Fund invests or to speculate on changes in credit default Swap spreads of specific issuers or financial indices).

FDIs may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining or hedging exposure to certain markets and securities in a quicker and/or more efficient manner). The FDIs that may be used by the Fund for such purposes include Warrants, Futures, Options (including Options on Futures), and Swaps (such as currency Swaps).

Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Financial Indices: In pursuance of its investment objective and with a view to managing exposure to credit events which may affect securities in its portfolio, the Fund may also invest in financial indices. These financial indices may deliver a variety of credit exposures and will meet the requirements of the Central Bank for financial indices. Investment in such financial indices will enable the Fund to obtain exposure to credit in a cost-effective manner and on a diversified basis (rather than, for example, separately acquiring individual components of a financial index). Credit

exposure delivered by these financial indices may be long exposure (for example, allocating a portion of assets to the purchase of securities which, together, represent the holdings of a financial index), Leveraged Exposure, Inverse Exposure, Inverse Leveraged Exposure or Synthetic Short Exposure. Financial indices may give exposure to, for example, fixed income instruments or credit default Swaps. These exposures may be achieved through vanilla indices and/or strategy indices. Strategy indices may typically involve algorithms which may be proprietary to the index sponsor. Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via: www.hermes-investment.com/financial-indices

The Fund may, subject to the conditions and within the limits laid down by the Central Bank, employ techniques and instruments relating to transferable securities, invest in and/or gain exposure to financial indices, cash and/or invest in money market collective investment schemes for efficient portfolio management purposes.

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

Leverage and Global Exposure

The Manager and the Investment Manager use a risk management technique known as absolute Value-at-Risk to assess the Fund's market risk to seek to ensure that the use of FDIs by the Fund is within regulatory limits. Using the Value-at-Risk approach for exposure measurement does not necessarily limit leverage levels. However, the Fund through its investments in FDIs will be leveraged.

The Fund's Value-at-Risk and expected level of leverage in terms of global exposure (as measured by the 'sum of notionals') is set out below.

VaR Approach	Expected Level of Leverage (as measured by the "sum of notionals")
Absolute	100% - 300% of Net Asset Value

*The "sum of the notionals" methodology measures leverage as the absolute value of the notionals of all derivative contracts used. It does not allow for offsets of FDI which reference the same underlying assets or hedging transactions and other risk mitigation strategies involving FDI, such as currency hedging, duration management and macro hedging. Consequently, the reported level of leverage based on the "sum of notionals" methodology may exceed, at times considerably, the economic leverage assumed by the Fund.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level" and "Hedging at Share Class Level against Base Currency" in the Prospectus.

Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

Investors should note that, while the Fund seeks to deliver positive absolute returns over a specified period irrespective of market conditions the Fund does not guarantee that this will be achieved over the specified period, or any other period, and in fact, the capital invested within the Fund is at risk.

In addition, investors should specifically refer to the following risks which appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:

Risk	Prospectus page reference
Bonds Risk	27
Collateral Reinvestment Risk	27
Credit Default Swaps Risk	28
Emerging Markets Risk	29
Forward Currency Exchange Contracts Risk	33
Futures Risk	34
Loans Investment Risk	34
Swaps Risk	39
Mortgage-Backed Securities and Asset-Backed Securities and Prepayment Risk	35

Dealing Information

Dealing Deadline	9.30 am (Irish time) on the relevant Dealing Day.
Valuation	<p>The Valuation Point will be close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant Investments at the close of business on the previous Dealing Day shall be used.</p> <p>The value of instruments or securities which are quoted, listed or dealt in on a Regulated Market shall (save in certain specific cases) be the last traded price on such Regulated Market as at the Valuation Point, or the closing mid-market price when no last traded price is available.</p>
Income Equalisation	The Fund operates Income Equalisation.
Timing of Payment for Subscriptions	Payment must be received by the Administrator by close of business on the third Business Day following the applicable Dealing Day.
Timing of Payment for Redemptions	Redemption proceeds will be paid on the third Business Day following the relevant Dealing Day.
Administrator's Fee	Up to 0.05% of the Net Asset Value of the Fund accrued and calculated daily and payable monthly in arrears. The Fund will also pay other costs to the Administrator such as transfer agency charges and transaction fees. Details are set out in the Prospectus in the section entitled "Fees and Expenses".
Depository's Fee	The Fund will bear transaction and custody charges which are calculated on the basis of the assets held. The Fund will also pay a depository fee of up to 0.0110% of its Net Asset Value to the Depository. The Fund will also pay other costs to the Depository such as out-of-pocket expenses and sub-custodial fees and expenses. Details are set out in the Prospectus in the section entitled "Fees and Expenses".
Other Fees and Expenses	All fees and expenses, not exceeding GBP50,000, relating to the establishment of the Fund, including the fees of the advisers to the Company, such as legal advisers, will be borne by the Fund and will be amortised over the first five financial years of the lifetime of the Fund or such other period as the Directors may determine and advise to Shareholders, for example via the Company's financial statements. The Fund shall bear its attributable proportion of the organisational and operating expenses of the Company (including any establishment expenses). Details of these and of other fees and expenses relating to the Company are set out in the Prospectus in the section entitled "Fees and Expenses".
Compulsory Redemption Threshold	All the Shares of the Fund may be compulsorily redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the Fund, the Net Asset Value of the Fund falls below GBP100,000,000 for any period of time.

Share Class Information

Fees

Class	Management Fee (Max)
A	0.40%
B	0.90%
F	0.40%
M	0.30%
P	0.40%
R	0.80%
T*	0.00%
Z**	0.00%

*Shareholders in the Class T Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 1% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

**Shareholders in the Class Z Shares will be subject to a fee with regard to their investment in the Fund based on the Client Agreement between them and the Investment Manager or its affiliate. This fee will not exceed 3% per annum of the value of the Shareholder's holding in the Fund. The Investment Manager (or its affiliate, if relevant) reserves the right to repurchase the entire holding of Shares of any Shareholder (deducting any amount owed for unpaid investment management fees), if the relevant Client Agreement is terminated for any reason whatsoever.

Minimum Transactions

Z	Per Client Agreement	Per Client Agreement	Per Client Agreement	Per Client Agreement

The above amounts can be paid in the currency stated or its foreign currency equivalent.

Capacity Management

The Directors may, at their absolute discretion, impose capacity management related constraints on the Fund. Please see the section headed "Capacity Management" in the Prospectus for more information. Details about whether the Fund is currently under capacity management constraints will be published on the Manager's website: www.hermes-investment.com/capacitymanagement.

Initial Offer of Shares

The Initial Offer Period in respect of all Share Classes that have not received subscriptions (as indicated by a tick below) will start at 9am on 12 August 2020 and close at 5pm on 11 February 2021. Share classes which have been seeded and therefore have a price available have been left blank.
