## Profile of a Typical Investor

The Fund may be suitable for investors seeking capital growth over at least a three to five-year time horizon who understand and accept the associated level of risk attached to the Fund. For more information please refer to the section entitled "Risk Factors".

**An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.**

## Investment Objective and Policies

### Investment Objective

The investment objective of the Fund is to achieve long-term capital appreciation.

### Investment Policy

The Fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of equity securities and equity-related securities of, or related to companies in, or companies that derive substantial revenues from, the developed and emerging European market region (including Russia and Turkey), but excluding the United Kingdom. These companies will be listed and/or traded on a Regulated Market worldwide.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement. The Company may, from time to time, determine to include information in its marketing materials in relation to the performance of an index or benchmark for comparison purposes. For the avoidance of doubt the Fund's objective is not to track the performance of an index or benchmark and the Fund is not constrained by the constituents of such index or benchmark. As at the date of this Supplement, the Investment Manager has determined that a relevant benchmark may be used for such purposes. The Fund does not charge any performance fees and, accordingly, no fees are paid to the Investment Manager on the basis of outperformance of an index or benchmark.

### Investment Strategy

The Investment Manager will seek to invest in companies with accelerating levels of income and cash flow that can demonstrate sustainable growth over the long term. Independent research is undertaken in order to identify companies and industries undergoing fundamental change that are not recognised by other investors in the market. The key criteria used in company and industry level analysis are franchise value, balance sheet strength, valuation levels and forces for change. The Investment Manager's approach is driven by stock selection; even when there is a strong thematic element it is the merits of the individual company that takes precedence. Generally, the Investment Manager focuses on entities with a free market capitalisation of EUR1 billion or more.

The Investment Manager identifies companies which it believes will generate capital appreciation. In addition to the analysis of individual companies set out above, the Investment Manager will also undertake assessment of the Environmental, Social and Governance ("ESG") qualities of the company through research and local investigation. ESG includes environmental items (such as the impact on natural resources), social issues (such as human rights) and governance (being the way in which the company is run). The Investment Manager assesses the ESG characteristics of a company by considering ESG research and scores from a wide variety of sources such as CDP, MSCI, Sustainalytics and Trucost amongst others. The Investment Manager believes that quantitative ESG data must be complemented by a fundamental bottom-up review of ESG issues, leveraging its knowledge of and direct contact and engagement with companies. The Investment Manager further assesses the ESG characteristics of a company by assigning an ESG score to each company within its investment universe. To generate these ESG

scores, the Investment Manager uses Federated Hermes' proprietary scoring methodology to score a company's ESG behaviours.. This proprietary ESG score favours companies with lower ESG risks and companies who are actively improving their focus on ESG issues. The ESG score is also used to identify where active engagement with companies by the Investment Manager would be useful, with the aim of reducing underperformance from poor ESG behaviours while also encouraging companies to act responsibly and improve sustainability.

The Fund's market exposure (which is exposure to the categories of Investments outlined below, and excludes cash held by the Fund) may vary in time and will typically range between 95%-100% for long positions and 0% for short positions of the Net Asset Value of the Fund, depending on the Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Fund. These ranges are not limits and the actual exposures may from time to time fall outside these estimated ranges.

The Fund is actively managed by the Investment Manager in accordance with the criteria set out in this Supplement and will seek to achieve its objective on an active basis, without reference to a benchmark. The Company shall use the MSCI Europe ex UK Index for performance comparisons with the Fund on certain marketing materials (e.g. fund fact-sheets, investor reports, shareholder presentations etc), as deemed appropriate. The MSCI Europe ex UK Index is a free float adjusted market capitalisation weighted index that is designed to measure the performance of shares in large and mid-sized companies, denominated in various currencies, which are listed in developed markets across Europe (excluding the United Kingdom). As at the date of this Supplement, the Investment Manager has determined that this benchmark may be used for such purposes. For the avoidance of doubt the Fund's objective is not to track the performance of an index or benchmark. The Fund does not charge any performance fees and, accordingly, no fees are paid to the Investment Manager on the basis of outperformance of an index or benchmark.

## Categories of Investments

With the exception of permitted investments in unlisted securities, Eligible CIS, FDIs, money market instruments, cash and cash equivalents, Investments of the Fund will be listed or traded on a Regulated Market.

**Equity:** The Fund may invest in a diversified portfolio of equity securities (such as ordinary shares, preference shares and/or rights) and equity-related securities (such as GDRs and ADRs) of, or related to companies in, or that derive substantial revenues from, the developed and emerging Europe market region. Investment in or exposure to such securities will be on a long-only basis. The Fund will continuously invest at least 66.67% of its net assets in equity assets as defined in sec. 2 para. 8 of the German Investment Tax Act (2018).

**Debt:** The Fund may invest in Investment Grade corporate fixed rate Convertible Debt Securities listed or traded on a Regulated Market worldwide. Investment in or exposure to such securities will be on a long-only basis.

**Eligible CIS:** The Fund may acquire units/shares of Eligible CIS, including exchange-traded funds and other sub-funds of the Company, where such Eligible CIS satisfy the requirements of the Central Bank. Investment in or exposure to such schemes will be on a long-only basis.

## Methods of Access and Efficient Portfolio Management

The Fund may gain exposure to the aforementioned equity and/or equity related securities and/or Eligible CIS through the use of FDIs and/or through investment in Convertible Debt Securities. A decision to use FDIs may be made for reasons such as efficiency (i.e. it may be cheaper to gain exposure to an underlying Investment than to purchase the Investment directly).

FDIs may also be used for efficient portfolio management purposes (for example, to assist in cash flow management, for cost effectiveness and for gaining exposure to certain markets and securities in a quicker and/or more efficient manner). The FDIs that may be used by the Fund for such purposes include Warrants, Futures and Forward Currency Exchange Contracts.

For efficient portfolio management purposes the Fund may invest in and/or gain exposure to financial indices, hold cash and/or invest in money market collective investment schemes (to, for example, equitise cash) subject to the conditions and limits of the Central Bank. Please see the section headed "Investment in FDIs and Efficient Portfolio Management" in the Prospectus for more information.

Any indices to which exposure is achieved will be in line with the investment strategy of the Fund. If utilised, details of the financial indices in which the Fund invests and/or gains exposure to will be found via [www.hermes-investment.com/financial-indices](http://www.hermes-investment.com/financial-indices).

For the avoidance of doubt, the Fund does not enter into repurchase and reverse repurchase agreements and/or engage in stock lending.

## Cash Management

The Fund's use of FDIs may result in it holding a portion of its Net Asset Value in cash or collateral holdings and in such circumstances the Fund may seek to implement an effective cash management policy. In pursuit of this policy the Fund may invest in collective investment schemes and money market instruments (such as short-dated government-backed securities, floating-rate notes, commercial paper, certificates of deposit, call accounts, treasury bills and treasury notes) and FDIs (of the type noted above).

## Leverage and Global Exposure

The Fund may be leveraged up to 10% of its Net Asset Value. That is, the total exposure associated with the investments of the Fund, including investments in FDIs, may amount to 110% of the Net Asset Value of the Fund. The Fund's global exposure will be calculated using the commitment approach.

## Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the currency exposure in accordance with the sections entitled "Hedging at Portfolio Level" and "Hedging at Share Class Level against Base Currency" in the Prospectus.

## **Investment Restrictions**

The Fund may invest up to 10% of its Net Asset Value in Russian listed or traded securities. Any such investment shall be limited to those securities which are listed or traded on the Moscow Exchange.

## Risk Factors

Potential investors and Shareholders are referred to the section of the Prospectus entitled "Risk Factors". Regard should be had to the risks outlined under the heading "General Risk Factors" as each of these risk factors will be relevant in the context of an investment in the Fund.

In addition, investors should specifically refer to the following risks that appear under the heading "Fund Specific Risk Factors", as these relate to risks arising as a result of the Fund's Investments and/or portfolio management techniques:
