Dear Shareholder

RE: Federated Hermes Multi Strategy Credit Fund – Change in method of calculating Global Exposure

We are writing to you as a Shareholder in Federated Hermes Multi Strategy Credit Fund (the “Fund”), a sub-fund the Company, to advise you of the change in method of calculating the global exposure for the Fund from the Commitment approach to absolute Value at Risk (“VaR”).

The risk limit applied to the Fund is changing from being measured as 100% of the Fund Commitment to 20% VaR of the Fund Net Asset Value (“NAV”). As a consequence, the Fund leverage limit will also increase from 200% to 300%. This change in risk measure will allow the Investment Manager, Hermes Investment Management Limited, to more effectively manage the risk levels in the Fund by making use of additional risk management techniques.

There will be no change to the Fund’s investment objective or in the instruments used by the Fund as a result of this amendment, and this will not alter the risk profile of the Fund.

The changes will be included in a revised version of the Supplement and are expected to take effect on or about 25th September 2020 or such later date on which the Central Bank approves the revised Supplement.

Copies of the revised Supplement will be available on request from the Manager and the Administrator or alternatively could be viewed on the following website: www.hermes-investment.com.

If you would like to discuss this matter further, please contact your usual Hermes representative, or contact the NT investor services team at FederatedHermes_TA_queries@ntrs.com.
